Art Unit: 1626

1. Claims 1-6 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 4 improperly refer to a figure. The claims should be complete in themselves. The claims refer to the same product and do not appear to point out any difference. The diffraction patterns are not of hydrates and would not appear to be definable by them. The NMRs of all 5 forms are similar and encompassed by the spectra. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Briggs.

Ex. 3, lines 30-40, recites the same process steps as the claims. If applicants obtain a different result it must be due to elements not recited in the claims.

3. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Briggs. Ex. 2 recites the same process steps as the claims. If applicants obtain a different result it must be due to elements not recited in the claims.
